

Mudassir Mohammed

Lead Software Engineer

pmuddasir@gmail.com | +91 9072203067 | mudassir.in | linkedin.com/mudassir-mohammed | github.com/pmudassir

Skills

Frontend – React.js, Next.js, Vue.js, Nuxt.js, React Native, TypeScript, JavaScript, Redux, Tailwind CSS, Shadcn/UI, Vuetify
Backend – Node.js, Express.js, NestJS, Python, FastAPI, tRPC, REST APIs, GraphQL, WebSockets, Socket.io, Go, RBAC
Databases – PostgreSQL, MySQL, MongoDB, Redis, Prisma, Vector Databases (pgvector, Pinecone, ChromaDB)
AI / LLM – RAG Pipelines, AI Agents & Tool Calling, LangChain, LangGraph, Embeddings, OpenAI, Gemini, Groq, Workflow Automation
Cloud / DevOps – AWS, Firebase, Docker, Nginx, Vercel, Git, Linux, CI/CD, Kubernetes Concepts

Experience

BestDoc Technology | Lead Software Engineer

Nov 2024 – Present

- Leading full-stack product development for healthcare workflow platforms using Vue.js, Nuxt.js, Node.js, and backend service integrations for enterprise hospital operations.
- Built and delivered the complete **Homecare module end-to-end**, covering patient workflows, service requests, approvals, operational dashboards, and workflow automation.
- Architected and streamlined the notification infrastructure for admins, hospital staff, and end users, significantly improving communication reliability and operational response times.
- Designed and implemented secure workflow features including OTP verification, request lifecycle completion flows, approval pipelines, and role-based access control systems.

App Stone | React Native Developer

Sep 2023 – Nov 2024

- Engineered cross-platform mobile applications using React Native, delivering highly responsive user experiences across iOS and Android based on production-ready Figma designs.
- Developed premium discovery and event-based features including personalized listings, venue discovery, and user engagement workflows.
- Implemented user profile management and booking experience improvements, reducing friction in conversion-critical user journeys.
- Integrated REST APIs and optimized app performance for better responsiveness and improved user retention.

Elclidse Technologies | Full Stack Developer

Oct 2022 – Sep 2023

- Developed full-stack web applications using the MERN stack, delivering scalable business applications with strong performance and responsive user interfaces.
- Built frontend interfaces, backend APIs, and database-driven workflows across multiple client projects.
- Participated in architecture discussions and created technical documentation that improved delivery speed and team onboarding.

Projects

OpsPilot – AI-Assisted Multi-Tenant Operations Platform | Python, FastAPI, SQLAlchemy, PostgreSQL, Next.js, Groq

- Built a multi-tenant operations request platform (FastAPI modular monolith, async SQLAlchemy, Alembic, Next.js) with org-scoped tenancy, role-based permissions, request routing, assignment, and lifecycle tracking.
- Shipped an LLM feature that turns free-text reports into structured request drafts (strict JSON schema, Pydantic validation, human review), with prompt-injection containment, per-user quotas, and token/latency usage tracking.
- Built an eval harness with deterministic grading across models and prompt versions (92% routing accuracy), and CI running pytest, Vitest, and Playwright E2E tests against real Postgres.

Nexus SaaS – Multi-Tenant Business Platform | Next.js, TypeScript, Prisma, PostgreSQL, NextAuth, Stripe

- Built a multi-tenant SaaS with subdomain routing, per-tenant feature flags, RBAC with 50+ permissions, and modules for website building, finance, HR, inventory, CRM, and Stripe billing.

Corinna AI – AI Sales Chatbot | Next.js, TypeScript, Prisma, Clerk, LLM APIs

- Built an embeddable AI chatbot that acts as a sales rep, qualifying leads, answering product questions, and booking appointments for businesses.

Education

University of Calicut

Bachelor of Arts in English

2020 – 2023
